MANAGEMENT DISCUSSION AND ANALYSIS REPORT

1) OVERVIEW OF THE ECONOMY

Global Economy

Global economy growth continued to stagnate following slow trades, low investments and policy uncertainties in advanced economies. Major global events during the year included United Kingdom's decision to leave the European Union and the outcome of presidential elections in United States of America both the events are expected to have long-term effects on the global economy. Global growth in 2016 was estimated at 3.1% and is projected to rise to 3.5% in 2017. Growth in emerging markets and developing economies is expected to pick up in 2017 on the back of fiscal stimulus measures in developed economies and narrowing of divergence between commodity exporters and importers. The main factors that could possibly weigh on the medium-term growth prospects across many emerging markets and developing economies are weak investments, below par levels of productivity coupled with heightened policy uncertainty, and protectionist pressures.

Indian economy

India emerged as a 'bright spot' in an otherwise subdued world economy when it overtook China in 2015-16 as the fastest-growing major economy in the world. Though India's fundamentals still remain strong, the recent demonetisation initiative undertaken by the Indian Government is expected to lower India's GDP growth from 7.6% in FY16 to 6.8% in FY17. The IMF mentioned that this cash shortage and slowed private consumption would only be a temporary disruption and the otherwise healthy economy will return to familiar territories post the predicted slowdown in FY17. The Indian Government's decisive policy man oeuvres towards ensuring fiscal consolidation and pegging back inflation will help it maintain economic stability in the years ahead. India's eight core infrastructure industries – coal, crude oil, natural gas, refinery products, fertilisers, steel, cement and electricity registered cumulative growth of 4.9% during the April-November period compared to 2.5% a year ago.

2) ANALYSIS AND REVIEW

Global Textile Industry

The textile and apparel industry has witnessed changes in the last few decades. Over the years, a major part of the industry has moved away from developed countries like the US, the EU and Japan to destinations like China, South Asia and South-East Asia. Two most vital variables which brought on this move were the availability of low-cost manpower and abundant of raw material in Asian countries. Today's textile and apparel sector is again at the cusp of some major structural changes. The demand pattern is governed by the economic growth of regions, which indicates a slowdown in developed countries while strong growth in China and India. The export growth rate of China has already slowed down, a trend that will lead China to lose some share of global market while still being the largest exporting nation. The opportunity arising because of China's export growth slowdown can help countries like India, Bangladesh, Vietnam, etc., to increase their trade share.

Indian Textile Industry

India's textiles sector is one of the oldest industries in Indian economy dating back several centuries. Even today, textiles sector is one of the largest contributors to India's exports with approximately 15 per cent of total exports. The textiles industry is also labour intensive and is one of the largest employers. The textile industry has two broad segments. First, the unorganised sector consists of handloom, handicrafts and sericulture, which are operated on a small scale and through traditional tools and methods. The second is the organised sector consisting of spinning, apparel and garments segment which apply modern machinery and techniques such as economies of scale.

The textile industry employs about 51 million people directly and 68 million people indirectly. India's overall textile exports during FY 2015-16 stood at US\$ 40 billion.

Textile plays a major role in the Indian economy. India accounts 63 per cent of the market share of textiles and garments. It contributes 14 per cent to industrial production and 4 per cent to GDP with over 45 million people, the industry is one of the largest source of employment generation in the country. The industry accounts for nearly 15 per cent of total exports.

The size of India's textile market in 2015 was around USD108.5 billion, which is expected to touch USD226 billion market by 2023, growing at a CAGR of 8.7 per cent between 2009-23E

Exports have been a core feature of India's textile sector. The Indian textiles export market estimated at \$18 billion is expected to grow at a CAGR of 4% as compared to the global CAGR of 3% over 2016-26

Opportunities and Threats

India, among the Asian countries, is one of the most competitive textile and apparel manufacturing centre today. For the Indian industry, these are specifically interesting times. India stands a chance to gain a prominent market share because of China's growth slowdown, supporting the Government policies and a strong raw material base. The way that India's own local request is likewise vast and developing is good to beat all.

Ministry of Textiles is encouraging investments through increasing focus on schemes such as Technology Up-gradation Fund Scheme (TUFS) and cluster development activities. TUFS for the textile sector to continue in the 12th Five Year plan with an investment target of USD24.8 billion. Under Union Budget 2016-17, USD226.1. USD701.9 million has been allocated to the Ministry of Textiles in order to support various schemes covering the textile industry million has been allocated for ATUF scheme for FY2016-17. Future opportunity in textile and apparel is beyond question but for businesses to gain market share overall competitiveness will be the key in terms of cost, quality, compliances, logistics, services and product development. Manufacturers have to confront four major challenges:

- Buyers command a strong control over manufacturing value chain,
- Low entry barriers lead to intense competition from unorganized players,
- National as well as bilateral/international policies have the potential to make or break an entire business model,
- Maximum trade is concentrated in price-sensitive commodity business lacking product differentiation.

In such a scenario, attaining manufacturing excellence becomes a function of five factors – productivity enhancement, market intelligence, sustainable manufacturing, product and design development and international partnerships.

Risk and Concerns

The key Risk management concern include those relating to identifying key risks to our business objectives, impact assessment, risk analysis, risk evaluation, risk reporting and disclosures, risk mitigation and monitoring and integration with strategy and business planning. Risk management refers to the practice of identifying potential risks in advance, analyzing them and taking precautionary steps to reduce/curb the risk. During the year under review, Risk Assessment and Management was carried out covering the entire gamut of business operations and the Board was informed of the same. Some of the identified risks are Human Risk, Technological Risk, Physical Risk, Economic Risk, Political Risk, Natural Risk, Inflation Risk and Interest Rate Risk.

ANNEXURE B TO THE AUDITORS' REPORT

Referred to in paragraph 10(f) under heading of "Report on other legal and regulatory requirements" of our report of even date
Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Act

1. We have audited the internal financial controls over financial reporting of Prakash Woollen & Synthetic Mills Limited (formerly known as Prakash Woollen Mills Limited), ("the Company") as of March 31, 2017 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

2. The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

3. Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing deemed to be prescribed under section 143(10) of the Act to the extent applicable to an audit of internal financial controls, both applicable to an audit of internal financial controls and both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material respects.
4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.
5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

6. A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that
 - (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
 - (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and
 - (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

7. Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
